Destination Reading

- Houghton Mifflin software program
- Phonemic awareness, phonics, vocabulary, and fluency
- Teamed with Soar to Success

Cloze Pro v2

- Houghton Mifflin software
- <http://clozepro.software.informer.com/2.0/>

The screenshot shows the Cloze Pro v2 software interface. On the left, there is a vertical list of words: surface, ash, buries, rock, pressure, skies, molten, volcano, lava, and gases. The word "surface" is currently selected. The main window displays the title "Volcanoes" and a paragraph of text with several blank spaces for the user to fill in. The text reads: "A volcano is an opening in the Earth's [redacted] that allows hot, _____ rock to escape from _____. Most volcanoes are mountains of _____ and ash. When _____ builds beneath the surface, the volcano _____. The molten rock, called _____, explodes out of the _____. As the magma flows it becomes _____. The hot lava _____ buildings and houses. Volcanic _____ also shoot out _____ and _____. For weeks after eruptions there may be dark _____, strong _____ and heavy _____." Below the text is a small illustration of a volcano erupting. The software's status bar at the bottom indicates "Ready", "Session: None", "Click on a cell to fill in the gap", and "Run Mode".
